

# ROYAL ALBERTA MUSEUM RESEARCH

## INTRODUCTION

Cataloging items at the Royal Alberta Museum as an internship for History 499. The Research and tools I used to help the museum create a detailed and accurate historical file and provenance for certain artifacts.

## TMS AND WEBSITES

TMS is The Museum System used by the majority of museums around the world used for managing and organizing museum collections, including objects, exhibits, and events.

Newspaper.com newspapers from years back from all over the world allowing you to use them as primary sources of peoples lives (obituaries, wedding announcements, troop shipments and returns)

## THINGS I'VE LEARNED

Being concise without omitting important details or information.

Quick and relevant research of people and artifacts history without drawing my own assumptions or perspectives.

Better understanding of Micro-history and studying small things instead of larger events

Researching with limited resources or incomplete records.

The unseen work of people at museums (most items are never shown in exhibits)

## MY WORKS

### 1918-2018 Lest we Forget 25\$ Silver Helmet Coin

Shaped as the standard mark 1 helmet worn by canadian soldiers during ww1 with scratches and dents

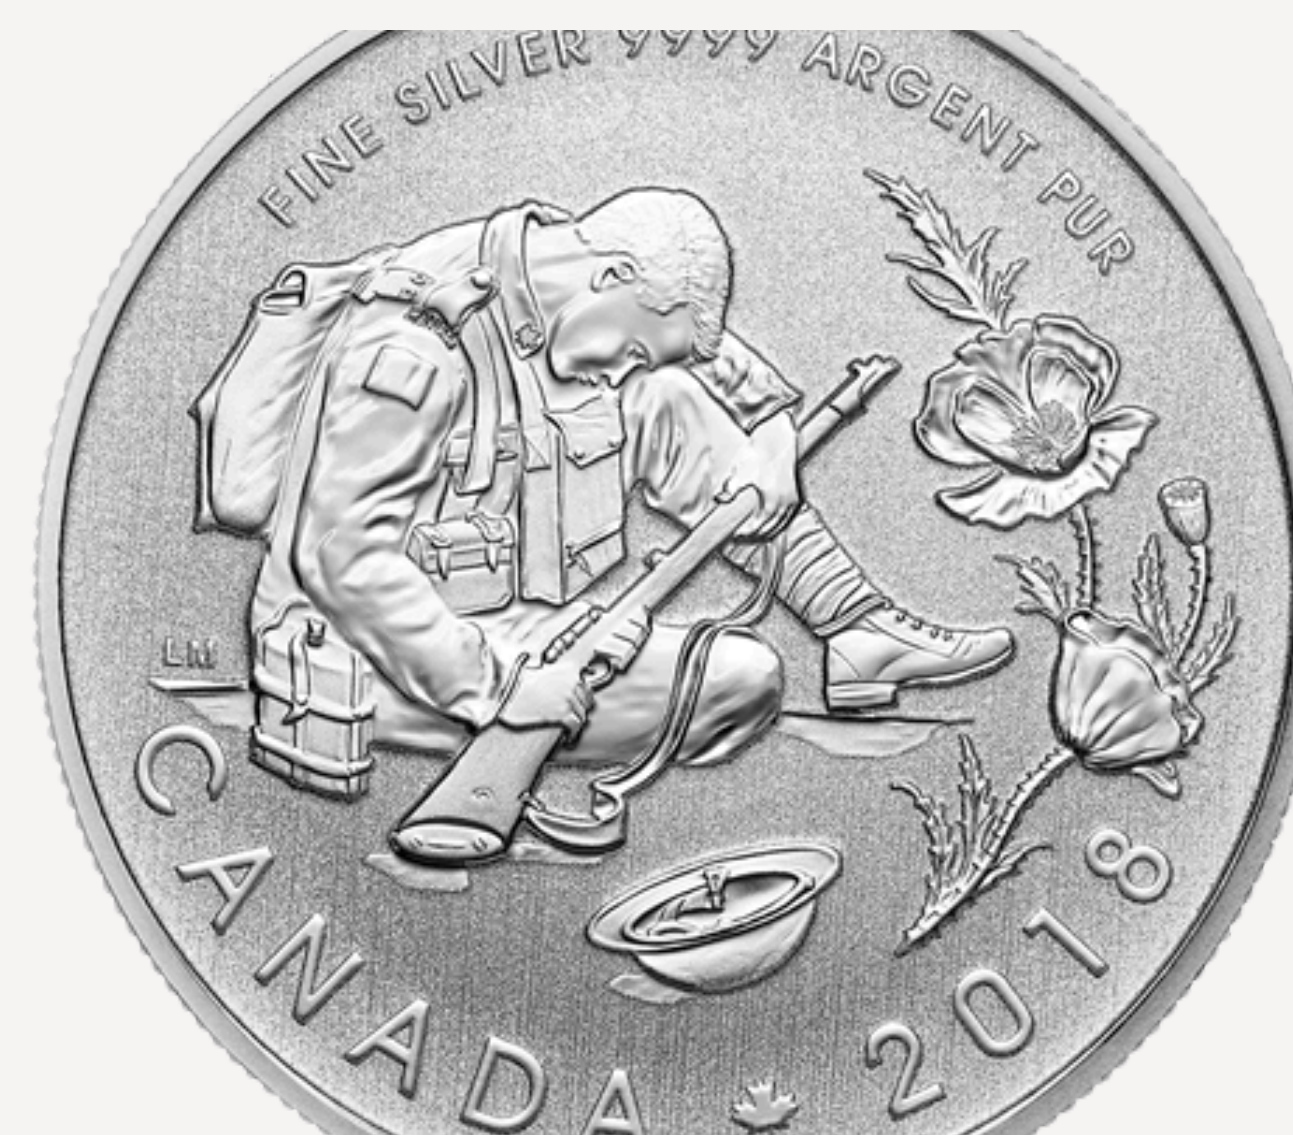

### WW2 Battle Dress

A world war 2 Battle dress or blouse worn by a world war 2 veteran from Edmonton Athabasca region

### 1/2 oz. Pure Silver Coin - 100th Anniversary of the Armistice

a memento to honour the legacy of the combatants whose contributions we remember on November 11.

### Armistice Coin Royal Canadian Mint

2018 Special Edition Proof Silver Dollar - 100th Anniversary of the Armistice of the First World War

## IMPORTANCE

Preserving part of History to understand and keep records of historically relevant events  
Recording the items incase of lost or damage occurs.  
Giving historical context and provenance of items for accurate information about the items.
